

## 2015 National Winter Maintenance Peer Exchange Minneapolis, Minnesota Instructions for Invited Guests

The National Winter Maintenance Peer Exchange has become a tradition held every other year and has proven to be the premier forum to learn about the best practices in winter maintenance and help set the national winter maintenance research program. The next National Winter Maintenance Peer Exchange will be held September 23-25, 2015 in Minneapolis, Minnesota at the Crowne Plaza MSP Airport – Mall of America.

The technical program for the Peer Exchange will include one day devoted to briefings on the most current research in winter maintenance and RWIS technologies from the various groups, consortia, and other agencies involved winter maintenance. Building on the success and positive response from the 2013 Peer Exchange a full day will be devoted to presentations of *“best practices and innovations.”* These sessions and presentations will prove to be invaluable for generating implementable ideas to take back to your organization. In addition, there will be numerous opportunities for networking and interaction with the vendor community.

We are looking forward to your participation in the National Winter Maintenance Peer Exchange. As an invited guest your travel, lodging, and per diem including the registration fees will be provided through the 2015 National Winter Maintenance Peer Exchange Project.

Please verify your attendance by registering at the website:

<http://www.aurora-program.org/nationalPeerXchg/>

Completely enter your personal information and under the Registration Fees block, select “invited guest”. Once verified as an invited guest the logistics coordinator, Judy Thomas, will contact you to arrange for your travel and verify your lodging arrival and departure dates.
